

## Pimachiowin Aki World Heritage Project Research Summary **Comparative Reviews**

To establish that Pimachiowin Aki is of outstanding universal value a comparative analysis to other similar landscapes is underway.

Comparisons need to be made with existing World Heritage Sites and other similar non-designated sites, internationally and nationally. The comparative analysis will explain the importance of the nominated property in its national and international context. The global review is supported by the best scientific information available.

At a minimum, Pimachiowin Aki will be compared with other sites in Canada and several boreal forest sites elsewhere in the World.
